1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES AND GOING CONCERN

A. Accounting Practices

The accompanying financial statements of Reliance Standard Life Insurance Company (the "Company") have been prepared in conformity with statutory accounting practices ("SAP") as set forth in the National Association of Insurance Commissioners ("NAIC") *Accounting Practices and Procedures* manuals and the NAIC *Annual Statement Instructions* manuals and with accounting practices prescribed by the State of Illinois.

B. Use of Estimates in the Preparation of the Financial Statements

The preparation of financial statements in conformity with SAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities. SAP also requires disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reporting period. Actual results could differ from those estimates.

C. Accounting Policy

Ordinary life insurance premiums are recognized as income over the premium-paying period of the related policies. Group life and accident and health premiums are earned ratably over the terms of the related insurance and reinsurance contracts or policies. Considerations for annuity and supplementary contracts with mortality or morbidity risk are recognized as revenue when received. Funds received from deposit-type contracts, annuity and supplementary contracts without mortality or morbidity risk, are recorded as an addition to policy reserves and are not recognized as revenue. Expenses incurred in connection with acquiring new insurance business, including acquisition costs such as sales commissions, are charged to operations as incurred.

In addition, the Company uses the following accounting policies:

- (1) Short-term investments are stated at cost or amortized cost except for those in reserve class six, which are stated at the lower of amortized cost or market value.
- (2) Bonds not backed by other loans are stated at amortized cost using the interest method, except for those in reserve class six, which are stated at the lower of amortized cost or market value.
- (3) Common stocks are stated at market value, except common stocks of affiliated companies, which are valued as stated in item (7) of this Note 1(C) and Note 10 below.
- (4) Preferred stocks are stated at cost, except for those in reserve classes four through six which are stated at the lower of cost or market value.
- (5) Mortgage loans on real estate are stated at amortized cost using the interest method.
- (6) Loan-backed securities are stated at either amortized cost or the lower of amortized cost or fair market value using the interest method; estimated cash flows are periodically updated versus the original purchase assumptions using the prospective method.
- (7) The Company owns 100% of the common stock of First Reliance Standard Life Insurance Company ("FRSLIC"). The Company's carrying value of the stock is equal to the statutory capital and surplus of FRSLIC. The Company owns 100% of the common stock of Standard Security Life Insurance Company of New York ("SSL"). The Company's carrying value of the stock is equal to the statutory capital and surplus of SSL, adjusted for unamortized goodwill as prescribed by SSAP No. 97 Investments in Subsidiary, Controlled and Affiliated Entities and SSAP No. 68 Business Combinations and Goodwill.
- (8) The Company has certain ownership interests in limited partnerships and limited liability companies. The Company carries these interests based on the underlying audited GAAP equity of the investee.
- (9) The Company's derivative instruments that do not meet the criteria to qualify for hedge accounting are accounted for at fair value and the related changes in fair values during the holding period are recorded as unrealized gains and losses.

- (10) The Company considers anticipated investment income in its review of reserves for potential premium deficiencies.
- (11) Unpaid claims and claim adjustment expenses include an amount determined from individual case estimates and loss reports and an amount, based on past experience, for losses incurred but not reported. Such liabilities are necessarily based on assumptions and estimates, and while management believes the amount is adequate, the ultimate liability may be in excess of or less than the amount provided. The methods for making such estimates and for establishing the resulting liability are continually reviewed and any adjustments are reflected in the period determined.
- (12) The Company has not modified its capitalization policy from the prior period.
- (13) Not Applicable.

The amounts reported in this statement that pertain to the entire business of the Company include, as appropriate, the activity of the Company's separate account business.

D. Going Concern

Management has no substantial doubt about the Company's ability to continue as a going concern based on current capitalization levels, historical profitable operating results, significant operating cash flows, as well as the existence of a capital support agreement for the Company's benefit with its parent company, Tokio Marine & Nichido Fire Insurance Company, Ltd, an insurance company domiciled in Japan ("TMNF").

2. <u>ACCOUNTING CHANGES AND CORRECTIONS OF ERRORS</u>

A. The Company has not made any material changes in its accounting policies during the three months ended March 31, 2023. No material errors occurred, or were required to be corrected, in the financial statements for the three months ended March 31, 2023.

On August 16, 2022, President Biden signed into law the Inflation Reduction Act ("ACT"), which included a new corporate alternative minimum tax ("CAMT"). The ACT and CAMT is effective for tax years beginning after 2022. On October 24, 2022, the NAIC adopted interpretive accounting guidance in response to the ACT entitled, Interpretation ("INT") 22-02: Third Quarter 2022 Reporting of the Inflation Reduction Act – Corporate Alternative Minimum Tax, which clarifies the required disclosures for third quarter 2022 reporting. On November 16, 2022, NAIC adopted revisions to INT 22-02 to extend it to December 31, 2022, and first quarter 2023 statutory financial statements. The Company has provided all required disclosures. See Note 9 – Income Taxes.

3. <u>BUSINESS COMBINATIONS AND GOODWILL</u>

NOTES TO FINANCIAL STATEMENTS

- (4) The gross unrealized losses and fair value of loan-backed securities aggregated by the length of time the individual securities have been in a continuous temporarily impaired position are as follows:
 - a. The aggregate amount of unrealized losses:

1. Less than 12 Months \$ (57,770,748) 2. 12 Months or Longer \$ (277,959,396)

b. The aggregate related fair value of securities with unrealized losses:

Less than 12 Months

 12 Months or Longer
 1,948,138,861

- (5) Declines in the fair value of investments that are considered in the judgment of management to be other than temporary are reported as realized losses. Management evaluates, among other things, the financial position and prospects of the issuer, conditions in the issuer's industry and changes in the amount or timing of expected future cash flows from the investment and recent changes in the credit ratings of the issuer by a ratings agency to determine if and when a decline in the fair value of an investment below amortized cost is other than temporary. The length of time and extent to which the fair value of the investment is lower than its amortized cost, the Company's ability and intent to retain the investment to allow for anticipated recovery in the investment's fair value and whether the Company has made a decision to sell the investment are other factors also considered.

- 1-3. A currency forward is an agreement to buy or sell a foreign currency, in return for U.S. dollars, at an exchange rate agreed upon today, to settle on a specific future date. All of the Company's forward contracts are traded over-the-counter, which exposes the Company to counterparty risk to the extent there are unrealized gains on open positions. To minimize counterparty risk, the Company evaluates all counterparties based on credit ratings and maintains master agreements with netting provisions and collateral requirements.

An option is an agreement that gives the buyer the right to buy (call option) or sell (put option) a financial instrument at a specified price within a specified time period. The buyer of an option pays a premium to the seller on the settlement date. This premium is the buyer's only cash requirement and represents the maximum amount at risk. The seller (or writer) of an option receives a premium from the buyer on the settlement date. The seller settles changes in the market value daily in cash. The Company is exposed to counterparty risk with respect to any over-the-counter options and minimizes this risk by requiring collateral from counterparties in an amount equal to any unrealized gains.

An interest rate futures contract is an agreement to buy or sell U.S. Treasury Bonds to settle on a specific future date. All of the Company's futures contracts are exchange traded which minimize counterparty risk. The Company satisfies the initial margin requirements with cash.

Interest rate swaps are used by the Company to reduce market risks from changes in interest rates and to protect against variability in future cash flows. In an interest rate swap, the Company agrees with another party to exchange, at specific intervals, the difference between fixed rate and floating rate interest amounts as calculated based upon an agreed upon notional amount.

During 2023, the Company used currency forward contracts to reduce the currency risk inherent in certain bond investments denominated in foreign currencies. The Company also used interest rate futures contracts to reduce interest rate-related risk related to certain bond investments.

- 1) The Company consolidates its federal income tax return with the return of its ultimate domestic parent, Delphi Financial Group, Inc. ("DFG"). DFG and all of its direct and indirect subsidiaries are members of the consolidated tax group. See Schedule Y, Part 1 for a list of the members of the consolidated tax group.
- 2) The method of allocation between the companies is subject to a written tax allocation agreement approved by the Company's Board of Directors. The agreement requires the Company to accrue federal taxes based on the amount of tax it would have paid or received if it had filed on a separate return basis with the Internal Revenue Service ("IRS") with the exception of operating losses which are reimbursed by the parent company. Intercompany tax balances are settled within 15 days after filing a tax return or receipt of a refund. If the amount of federal income taxes paid by the Company to DFG exceeds the amount of federal income taxes paid by DFG to the Internal Revenue Service, the excess of the amount will be placed in an escrow account. Escrow assets may be released to DFG from the escrow account when the permissible period for loss carryback has elapsed. Tax years 2013 and subsequent are still subject to audit by the IRS.

The ACT, signed into law by President Biden on August 16, 2022, included a number of tax related provision including a 15-percent book minimum tax ("corporate AMT") on "adjusted financial statement income" of applicable corporations. The Company has not determined as of the December 31, 2023 if they will be subject to CAMT in 2023. The 2023 financial statements do not include the estimated impact of the CAMT because a reasonable estimate cannot be made.

On December 21, 2011, the Company's ultimate parent, DFG, entered into an Agreement and Plan of Merger with Tokio Marine Holdings, Inc., a Japanese corporation ("Tokio Marine"), and TM Investment (Delaware) Inc. ("TM Sub"), a Delaware corporation which was wholly owned by TMNF which is a subsidiary of Tokio Marine. After being approved by DFG's stockholders and by the relevant regulatory authorities in Japan and the U.S., the merger transaction closed on May 15, 2012, pursuant to which TM Sub was merged with and into DFG, the surviving corporation in the merger. As a result, DFG became a subsidiary of TMNF and Tokio Marine became DFG's ultimate parent.

The outstanding shares of the Company's preferred stock are owned by DFG, Reliance Standard Life Insurance Company of Texas ("RSL-Texas"), the Company's direct parent, and Safety National Casualty Corporation ("SNCC"), a subsidiary of DFG. During the three months ended March 31, 2023, the Company paid cash dividends on its cumulative preferred stock issued to SNCC, DFG and RSL-Texas totaling \$1,000,000, \$800,000 and \$200,000, respectively.

During 2018, the Company entered into a reinsurance agreement with Tokio Marine RSL Re PIC, Ltd. ("TM RSL Re"), a Cayman Islands portfolio insurance company controlled by Safety National Re SPC, a Cayman Islands exempted company which is a wholly-owned subsidiary of SNCC, under which the Company ceded to TM RSL Re, on an indemnity coinsurance with funds withheld basis, funding agreements previously issued by the Company on various dates in connection with the Company's funding agreement-backed note program. As of December 31, 2022, the Company ceded funding agreements in an aggregate principal amount of \$1,800,000,000 to TM RSL Re under this agreement, of which \$1,100,000,000 and \$700,000,000 in aggregate principal amount are ceded on an 84.5% and 81.5% quota share basis, respectively.

The purpose of the amendment was to facilitate the Company's exit from the medical stop loss line of business by selling this business to HCC Life. A. Defined Benefit Plans

During 2009 and prior, the Company sponsored a supplemental executive retirement plan. The plan provided certain key employees with the opportunity for additional postemployment income, which would otherwise have been limited under the pension plan. The plan is a nonqualified tax-deferred retirement plan and is not funded. Effective December 31, 2009, the plan was frozen and will not accept new participants after that date. Existing participants in the plan will not accrue any additional benefits under the plan.

The Company provides certain health care and life insurance benefits ("postretirement benefits") for retired employees. The health care plan is non-contributory for current retirees and those employees who attained age 55 with ten years of service by December 31, 1992. Cost sharing features include deductibles and co-payment provisions. Other employees will be eligible for a dollar denominated postretirement health plan. Life insurance benefits are generally set at a fixed percentage of policy face value based on the employee's age. Employees hired after December 31, 1992 are not eligible for any postretirement benefits. The Company funds postretirement benefit payments as claims are incurred or as premium payments are due to the insurer. The assets, benefits obligations and periodic costs related to these plans are not material to the Company's financial position or results of operation.

B-D. Not applicable.

E. Defined Contribution Plans

The Company sponsors a qualified tax-deferred retirement savings plan for employees of the Company or its affiliates, who are at least 21 years old. In addition, the Company sponsors a nonqualified tax-deferred savings plan for certain key employees. The Company has created this plan as an additional tax-deferred savings option for highly compensated employees whose compensation exceeds the limit on the tax-deferred savings plan or whose contributions to the deferred savings plan are limited to ensure the plan's compliance with a nondiscrimination test.

During the three months ended March 31, 2023, the Company made matching contributions for every dollar the employee contributes under the combined plans, up to 4% of the employee's before-tax contributions. The Company's contributions to the plans were not material.

20. FAIR VALUE MEASUREMENTS

A. The methodologies and valuation techniques used by the Company to value those of its assets, which are measured at fair value are described below.

Instruments included in bonds include mortgage-backed and corporate securities, U.S. Treasury and other U.S. government guaranteed securities, securities issued by U.S. government-sponsored enterprises, and obligations of U.S. states, municipalities and political subdivisions. The market liquidity of each security is taken into consideration in the valuation technique used to value such security. For securities where market transactions involving identical or comparable assets generate

sufficient relevant information, the Company employs a market approach to valuation. If sufficient information is not generated from market transactions involving identical or comparable assets, the Company uses an income approach to valuation.

The majority of the instruments included as bonds are valued utilizing observable inputs; accordingly, they are categorized in either Level 1 or Level 2 of the fair value hierarchy described below. However, in instances where significant inputs utilized are unobservable, the securities are categorized in Level 3 of the fair value hierarchy.

The inputs used in the valuation techniques employed by the Company are provided by nationally recognized pricing services, external investment managers and internal resources. To assess these inputs, the Company's review process includes, but is not limited to, quantitative analysis including benchmarking, initial and ongoing evaluations of methodologies used by external parties to calculate fair value, and ongoing evaluations of fair value estimates based on the Company's knowledge and monitoring of market conditions.

The levels are categorized as follows:

Level 1- Valuation is based upon quoted prices for identical assets or liabilities in active markets. Level 1 fair value is not subject to valuation adjustments or block discounts.

Level 2 - Valuation is based upon quoted prices for similar assets or liabilities in active markets or quoted prices for identical or similar instruments in markets that are not active. In addition, a company may use various valuation techniques or pricing models that use observable inputs to measure fair value.

Level 3 - Valuation is generated from techniques in which one or more of the significant inputs for valuing such assets or liabilities are not observable. These inputs may reflect the Company's best estimates of the various assumptions that market participants would use in valuing the financial assets and financial liabilities.

Other investments held at fair value primarily consist of common stock, currency forwards and purchased option contracts. For private equity investments, since quoted market prices are not available, the transaction price is used as the best estimate of fair value at inception. When evidence is believed to support a change to the carrying value from the transaction price, adjustments are made to reflect expected exit values. Ongoing reviews by Company management are based on assessments of each underlying investment, and the inputs utilized in these reviews include, among other things, the evaluation of financing and sale transactions with third parties, expected cash flows, material events and market-based information. These investments are included in Level 3 of the fair value hierarchy.

(4)-(5) Not applicable.

- B. Not applicable.
- C. The carrying values and estimated fair values of certain of the Company's financial instruments not recorded at fair value in the consolidated balance sheets are shown below. Because fair values for all balance sheet items are not required to be disclosed, the aggregate fair value amounts presented below are not reflective of the underlying value of the Company.

The fair values for bonds, preferred and common stocks and other invested assets have been primarily obtained from broker-dealers, asset managers, or nationally recognized pricing organizations and, in the case of certain structured notes, by reference to the fair values of the underlying investments. The carrying values for loans approximate fair values because these investments are primarily either short-term in duration or have an underlying interest rate that is variable. The Company has assessed the fair value of the loans based on a representative sample and determined that any remaining difference between the fair value and carrying value of loans is not material. There are no quoted market prices available for the Company's surplus notes.

Fair values for policyholder account balances were determined by deducting an estimate of the future profits to be realized from the business, discounted at a current interest rate, from the adjusted carrying values. Separate account liabilities are recorded at the amount credited to the contract holder, which reflects the fair value of the corresponding separate account assets, and therefore, carrying value approximates fair value.

D. Not practicable to estimate Fair Value.
