B. No significant change.

C. Accounting Policy

Ordinary life insurance premiums are recognized as income over the premium-paying period of the related policies. Group life and accident and health premiums are earned ratably over the terms of the related insurance and reinsurance contracts or policies. Considerations for annuity and supplementary contracts with mortality or morbidity risk are recognized as revenue when received. Funds received from deposit-type contracts, annuity and supplementary contracts without mortality or morbidity risk, are recorded as an addition to policy reserves and are not recognized as revenue. Expenses incurred in connection with acquiring new insurance business, including acquisition costs such as sales commissions, are charged to operations as incurred.

In addition, the Company uses the following accounting policies:

- (1) No significant change.
- (2) Bonds not backed by other loans are stated at amortized cost using the interest method, except for those in reserve class six, which are stated at the lower of amortized cost or market value.
- (3-5) No significant change.
- (6) Asset-backed structured securities, excluding residual tranches or interests, are stated at amortized cost, except for those in reserve class six, which are stated at the lower of amortized cost or fair market value using the interest method; estimated cash flows are periodically updated versus the original purchase assumptions using the prospective method. Residual tranches or interests with underlying assets having characteristics of fixed income instruments are stated at the lower of amortized cost or fair value.
- (7-8) No significant change.
- (9) The Company's derivative instruments that do not meet the criteria to qualify for hedge accounting are accounted for at fair value and the related changes in fair values during the holding period are recorded as changes in unrealized gains and losses. The derivative instruments that are elected for and meet the criteria to qualify for hedge accounting are accounted for at the hedged assets' valuation methodology.
- (10-12) No significant change.
- (13) Not applicable.

The amounts reported in this statement that pertain to the entire business of the Company include, as appropriate, the activity of the Company's separate account business.

D. Going Concern

Management has no substantial doubt about the Company's ability to continue as a going concern based on current capitalization levels, historical profitable operating results, significant operating cash flows, as well as the existence of a capital support agreement for the Company's benefit with its parent company, Tokio Marine & Nichido Fire Insurance Company, Ltd, an insurance company domiciled in Japan ("TMNF").

NOTES TO FINANCIAL STATEMENTS

2. ACCOUNTING CHANGES AND CORRECTIONS OF ERRORS

The Company has not made any material changes in its accounting policies during the quarter ended June 30, 2026. No material errors occurred or were required to be corrected in the financial statements for the quarter ended June 30, 2026.

3. BUSINESS COMBINATIONS AND GOODWILL No significant change.

4. DISCONTINUED OPERATIONS Not applicable.

5. INVESTMENTS

D. Asset-Backed Securities

- (1) Prepayment assumptions for mortgage-backed and asset-backed securities were obtained from external managers or internal estimates. These assumptions are consistent with the current interest rate environment. The prospective adjustment method is used for all securities.
- (2) Not applicable.
- (3) The Company experienced other-than-temporary impairments based on either a) the Company's intent to sell or inability or lack of intent to retain the investment in the security for a period of time sufficient to recover the amortized cost basis or b) a discounted cash flow analysis comparing the present value of projected cash flows, using the effective interest rate, to the book value and market value of each security to determine potential credit-related shortfalls. These impairments are presented in the table below:

(4) The gross unrealized losses and fair value of asset-backed securities aggregated by the length of time the individual securities have been in a continuous temporarily impaired position are as follows:

a. The aggregate amount of unrealized losses:

1. Less than 12 Months	\$ (35,308,367)
2. 12 Months or Longer	\$ (77,100,576)

2. 12 Months or Longer	\$ 754,457,729

NOTES TO FINANCIAL STATEMENTS

(5) Declines in the fair value of investments that are considered in the judgment of management to be other than temporary are reported as realized losses. Management evaluates, among other things, the financial position and prospects of the issuer, conditions in the issuer's industry and changes in the amount or timing of expected future cash flows from the investment and recent changes in the credit ratings of the issuer by a ratings agency to determine if and when a decline in the fair value of an investment below amortized cost is other than temporary. The length of time and extent to which the fair value of the investment is lower than its amortized cost, the Company's ability and intent to retain the investment to allow for anticipated recovery in the investment's fair value and whether the Company has made a decision to sell the investment are other factors also considered.

F. Consolidated Federal Income Tax Return

- 1) The Company consolidates its federal income tax return with the return of its ultimate domestic parent, Delphi Financial Group, Inc. (“DFG”). DFG and all of its direct and indirect subsidiaries are members of the consolidated tax group. See Schedule Y, Part 1 for a list of the members of the consolidated tax group.
- 2) The method of allocation between the companies is subject to a written tax allocation agreement approved by the Company’s Board of Directors. The agreement requires the Company to accrue federal taxes based on the amount of tax it would have paid or received if it had filed on a separate return basis with the Internal Revenue Service (“IRS”) with the exception of operating losses which are reimbursed by the parent company. Intercompany tax balances are settled within 15 days after filing a tax return or receipt of a refund. If the amount of federal income taxes paid by the Company to DFG exceeds the amount of federal income taxes paid by DFG to the Internal Revenue Service, the excess of the amount will be placed in an escrow account. Escrow assets may be released to DFG from the escrow account when the permissible period for loss carryback has elapsed. Tax years 2013 and subsequent remain subject to audit by the IRS.

G. Federal or Foreign Income Tax Loss Contingencies:

The Company does not have tax loss contingencies for which it is reasonably possible that the total liability will significantly increase within twelve months of the reporting date.

H. Not applicable.

I. Inflation Reduction Act - Corporate Alternative Minimum Tax (“CAMT”)

The DFG United States Federal tax return filing group, of which the Company is a member, meets the average “adjusted financial statement income” threshold and is required to perform CAMT calculations in 2026. The Company, which is included in a consolidated tax return, is an applicable reporting entity. The Company has determined as of June 30, 2026, that it does not expect to be liable for CAMT in 2026 and does not recognize any CAMT credit DTA.

The Company is not an applicable reporting entity with tax allocation agreement exclusions for the CAMT.

The reporting entity has made an accounting policy election to disregard CAMT when evaluating the need for a valuation allowance for its non-CAMT DTAs.

20. FAIR VALUE MEASUREMENTS

A. The methodologies and valuation techniques used by the Company to value those of its assets, which are measured at fair value are described below.

Instruments included in issuer credit obligations include corporate securities, U.S. Treasury and other U.S. government guaranteed securities, securities issued by U.S. government-sponsored enterprises, and obligations of U.S. states and municipalities. Instruments included in asset-backed securities include residential and commercial mortgage-backed securities. The market liquidity of each security is taken into consideration in the valuation technique used to value such security. For securities where market transactions involving identical or comparable assets generate sufficient relevant information, the Company employs a market approach to valuation. If sufficient information is not generated from market transactions involving identical or comparable assets, the Company uses an income approach to valuation.

The majority of the instruments included as bonds are valued utilizing observable inputs; accordingly, they are categorized in either Level 1 or Level 2 of the fair value hierarchy described below. However, in instances where significant inputs utilized are unobservable, the securities are categorized in Level 3 of the fair value hierarchy.

The inputs used in the valuation techniques employed by the Company are provided by nationally recognized pricing services, external investment managers and internal resources. To assess these inputs, the Company’s review process includes, but is not limited to, quantitative analysis including benchmarking, initial and ongoing evaluations of methodologies used by external parties to calculate fair value, and ongoing evaluations of fair value estimates based on the Company’s knowledge and monitoring of market conditions.

The levels are categorized as follows:

Level 1- Valuation is based upon quoted prices for identical assets or liabilities in active markets. Level 1 fair value is not subject to valuation adjustments or block discounts.

Level 2 - Valuation is based upon quoted prices for similar assets or liabilities in active markets or quoted prices for identical or similar instruments in markets that are not active. In addition, a company may use various valuation techniques or pricing models that use observable inputs to measure fair value.

Level 3 - Valuation is generated from techniques in which one or more of the significant inputs for valuing such assets or liabilities are not observable. These inputs may reflect the Company's best estimates of the various assumptions that market participants would use in valuing the financial assets and financial liabilities.

Other investments held at fair value primarily consist of common stock, currency forwards and purchased option contracts. For private equity investments, since quoted market prices are not available, the transaction price is used as the best estimate of fair value at inception. When evidence is believed to support a change to the carrying value from the transaction price, adjustments are made to reflect expected exit values. Ongoing reviews by Company management are based on assessments of each underlying investment, and the inputs utilized in these reviews include, among other things, the evaluation of financing and sale transactions with third parties, expected cash flows, material events and market-based information. These investments are included in Level 3 of the fair value hierarchy.

The fair values for bonds, preferred and common stocks and other invested assets have been primarily obtained from broker-dealers, asset managers, or nationally recognized pricing organizations. The carrying values for loans approximate fair values because these investments are primarily either short-term in duration or have an underlying interest rate that is variable. The Company has assessed the fair value of the loans based on a representative sample and determined that any remaining difference between the fair value and carrying value of loans is not material. There are no quoted market prices available for the Company’s investment in affiliated surplus notes, and FHLB Chicago common stock.

Fair values for policyholder account balances were determined by deducting an estimate of the future profits to be realized from the business, discounted at the current interest rate, from the adjusted carrying values. Separate account liabilities are recorded at the amount credited to the contract holder, which reflects the fair value of the corresponding separate account assets, and therefore, carrying value approximates fair value.

NOTES TO FINANCIAL STATEMENTS
